

QRES TECHNOLOGIES LAUNCHES NEW HS VERSION OF THE F-SERIES

Qres Technologies, a developer and producer of sophisticated UV inkjet systems for the Graphic & Signage and Industrial market, is introducing a new generation of large format UV printers: F160 HS, F160L HS and F200 HS.

The generation of F-Series HS printers is based on qualities of previous models of F-Series printers, such as unique design, exceptional versatility and impressive range of options and special features.

“We have expanded our portfolio of products by new generation of printers working with the latest print head technology” comments Lukas Törngren, CEO, Qres Technologies. These high performance large format UV flatbed printers are fitted with the latest generation of high speed inkjet drop-on-demand print heads delivering unparalleled sharpness and photographic quality. “Therefore users of F-Series HS printers gain superior speed and higher image quality” Törngren adds.

F-Series HS printers are available in three table sizes, from 1,65m x 2,55m up to 2,05m x 3,25m, to match various formats requirements.
