

KEENCUT

THE WORLD'S FINEST CUTTING MACHINES

Steel TraK

The SteelTraK has been designed and built by Keencut engineers to surpass all current standards and meet the exceptional demands of the 21st century sign industry.

Building on the huge success of the all-purpose Keencut Excalibur, and recognising the increasing demands of thicker, tougher sign materials, the design brief was simple. "Create a brand new vertical cutting machine exclusively for the Sign Maker. It must be the best manual cutter ever made but offer exceptional value for money. It must be strong, versatile, capable, easy to use, virtually maintenance free and built to last almost indefinitely. It must withstand the closest scrutiny, the toughest tests and deserve a place in every sign making workshop".

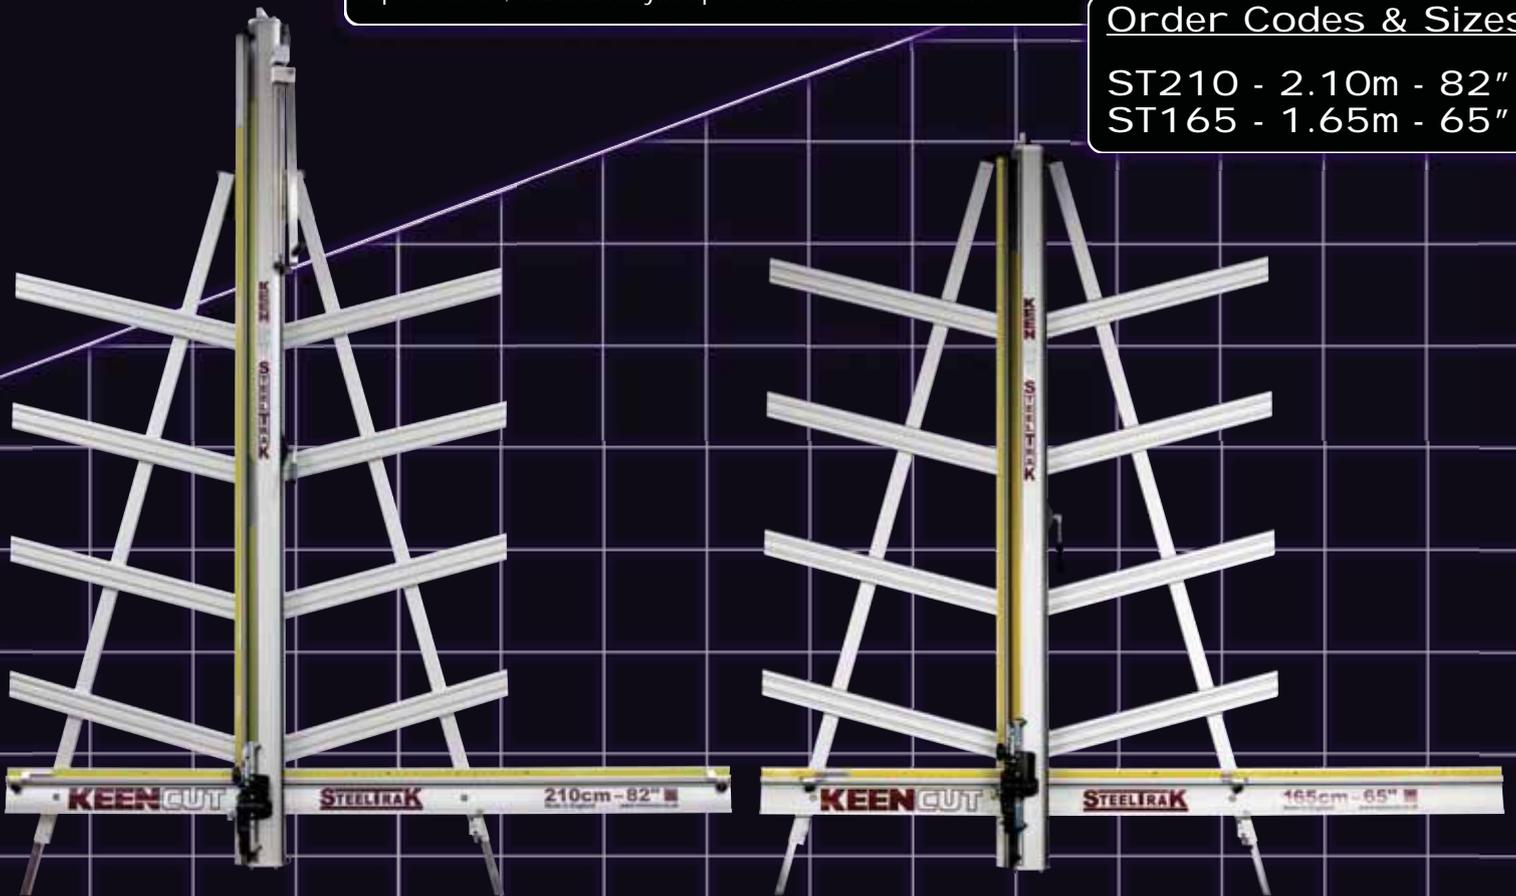

In other words it has to be the best, the very best. It is, and we call it SteelTraK.

Will Cut...

Aluminium 1.6mm; Aluminium Composite (Dibond®) up to 5mm; PVC Foamboard, Foam-Centred Board, Corrugated Plastics & cardboard up to 13mm; Glass & Acrylic up to 6mm and much more...

Features

- ▶ 5 year Guarantee
- ▶ Full length extra-grip clamping system
- ▶ Integral counterbalance for total convenience
- ▶ Telescopic legs adjust for height & minimum fatigue
- ▶ 4 Turn and Lock ready mounted tools for instant action
- ▶ Designed specifically for the design and display industries
- ▶ All four blades cut on the same line; no wasted panels, no mistakes
- ▶ Accepts bolt-on accessories; suitable for existing & future innovations
- ▶ Precise screw adjusted perma-lock squaring. Accurately cut panels every time
- ▶ Pre lubricated ball bearings on steel tracks for precision, low friction and a trouble-free life without adjustment

SteelTraK Accessories

V-Groove Attachment

Another major first for Keencut is the new patented SteelTraK V-Groove Cutter to enable 90° folding of Aluminium composite and PVC foamboard. Cutting smoothly and silently without electrical power debris or burred edges SteelTraK V-groove Cutting Tools are available for thicknesses of 2mm, 3mm, 4mm, 5mm, & 6mm Aluminium Composite and PVC board. The construction of sign trays, self standing displays and boxes was never accomplished with a simpler, faster or more economical cutting system.

Designed with the future in mind the Keencut SteelTraK enables the selected cutting tools to be fitted and removed in seconds from the unique 4-function counterbalanced sliding carriage with a single finger screw.

ST90VB - 90° Blades (x5)

FSK165
Free-standing Kit for
ST165

FSK210
Free-standing Kit for
ST210

Free-standing Kit

The strong yet simple free-standing attachment turns the SteelTraK into a self-supporting tripod allowing the machine to be positioned anywhere in a workshop.

Both versions of the kit are supplied with a rear support leg and mounting bracket and the FSK210 includes an additional support leg that prevents the free-standing machine from tipping under heavy loading.

Additional Leg on ST210 Only
